Project Description:

The Kansas City Convention and Entertainment Facilities Department (KCCEFD) is seeking proposals from qualified vendors for the redesign, development and launch of a premier convention facilities website. Our current website is approximately twelve years old and does not effectively communicate with our services, lacks user-friendly navigations, and lacks modern design standards. Management's objective is to create a platform that is engaging, interactive, informative, and easily navigable online presence that reflects our commitment to delivering exceptional convention experiences and impressions among our convention competitors.
