### Description

The Agency is currently conducting a project that aims to design, develop, evolve and operate the website to achieve its business and communication objectives, including on improving its positioning as a player in sustainable mobility. As part of this project, the Agency wishes to develop a solution (Website) that will be developed for and deployed on, the composable DXP environment provided by the Agency, which will delegate certain management rights to the Adjudicator

The Adjudicator shall be responsible for end-to-end delivery of the Solution, from design to stabilization, and will also work on its subsequent evolution and operation. Its service will have to cover all functional, technical and strategic to deliver a powerful, secure and aligned solution on the vision of the Agency's customer experience.
